Dan,

A tardy note to tell you that the life jacket solved my dog's problem of ingesting too much pool water then spitting it up.

Not once since she's worn the jacket has she spit up in or out of the pool.

I had no problem introducing it to her – she received it openly.

An additional benefit is that resistance it adds to her workout.

Bravo! A winner of a product!

Another swim mate' is using one to keep his ears out of water as he won't swim if his ears get wet.

Thank you from all of us who couldn't bear to stop our dogs from swimming issues.

Susan Gabriel
